

1. The Earth is the third planet from the Sun and the only known planet to support life.
2. Water covers approximately 71% of the Earth's surface.
3. The Great Wall of China is the longest man-made structure in the world.
4. Python is a high-level programming language known for its simplicity and readability.
5. The speed of light in a vacuum is approximately 299,792 kilometers per second.
6. Mount Everest is the highest peak above sea level, standing at 8,848 meters.
7. The human body has 206 bones in adulthood.
8. The capital of France is Paris, which is also known as the "City of Light."
9. The Internet was first developed in the late 1960s as a project called ARPANET.
10. The periodic table has 118 confirmed elements as of 2023.
11. The Amazon Rainforest is the largest tropical rainforest in the world.
12. The Python programming language was created by Guido van Rossum and first released in 1991.
13. The Milky Way galaxy contains an estimated 100 billion stars.
14. The Eiffel Tower was completed in 1889 and is one of the most iconic landmarks in the world.
15. The human brain weighs approximately 1.4 kilograms and contains about 86 billion neurons.
16. The first computer programmer was Ada Lovelace, who wrote algorithms for Charles Babbage's Analytical Engine.
17. The Sahara Desert is the largest hot desert in the world, covering much of North Africa.
18. The Python standard library includes modules for working with dates, times, and file systems.
19. The speed of sound in air is approximately 343 meters per second at room temperature.
20. The Statue of Liberty was a gift from France to the United States and was dedicated in 1886.
21. The human heart beats approximately 100,000 times per day.
22. The first moon landing was achieved by NASA's Apollo 11 mission in 1969.
23. The Python programming language is widely used in data science, machine learning, and web development.
24. The Nile River is the longest river in the world, stretching over 6,650 kilometers.
25. The human body produces about 25 million new cells every second.
26. The first electronic computer, ENIAC, was completed in 1945.
27. The Python language is named after the British comedy group Monty Python.
28. The Pacific Ocean is the largest and deepest ocean on Earth.
29. The human eye can distinguish approximately 10 million different colors.
30. The first website was created by Tim Berners-Lee in 1991.

31. The Python programming language supports object-oriented, imperative, and functional programming paradigms.
32. The tallest building in the world is the Burj Khalifa in Dubai, standing at 828 meters.
33. The human body contains about 60% water by weight.
34. The first smartphone was introduced by IBM in 1994.
35. The Python standard library includes a module called ``os`` for interacting with the operating system.
36. The longest mountain range in the world is the Andes,
